Process for Determining Supporting Organization Status

Supporting organizations receive public charity status from the IRS due to their particular relationship with another publicly supported charity or government unit. Based on that relationship, a supporting organization is defined as Type I, Type II, or Type III. Type III supporting organizations are further defined as functionally or non-functionally integrated. The Foundation must exercise expenditure responsibility if it makes grants from a donor advised fund to any type of supporting organization that supports a public charity which is controlled directly or indirectly by the donor, donor advisor, or a related person. Expenditure responsibility is also required for grants to any non-functionally integrated Type III supporting organization.

The Foundation will take the following steps to determine whether a grant recommendation from a Donor Advised Fund requires expenditure responsibility because the grantee is a supporting organization:

1. Verify that the organization is a public charity by checking its status in IRS Publication 78, the organization's IRS determination letter, or IRS Business Master File.
2. Determine if the public charity is a supporting organization from one of the following sources:
 - a. The IRS Business Master File (BMF) and the potential grantee's IRS determination letter, or
 - b. A report from a third party that includes:
 - i. the grantee's name, EIN, and public charity classification under §509(a)(1), (2), or (3);
 - ii. a statement that the information is from the most currently available IRS monthly update to the BMF, along with the IRS BMF revision date;
 - iii. the date and time of the Foundation's search, the documentation of which, must be retained in electronic or hard-copy form.
3. Determine the type of Supporting Organization from one of the following sources:
 - a. For Type I or Type II supporting organizations a written representation signed by an officer, director, or trustee of the grantee if both of the following are true:
 - i. The representation describes the process used for selecting the grantee's officers, directors, or trustees and references the pertinent provisions of the grantee's organizing documents that establish the grantee's relationship to its supported organization.
 - ii. The Foundation collects and reviews copies of the grantee's governing documents. If the grantee's governing documents are not sufficient to establish the relationship, the Foundation must also collect organizing documents from the supported organization.
 - b. To determine whether a Type III supporting organization is functionally integrated, the Foundation will do the following:
 - i. Obtain the grantee's written representation identifying the organization it supports.
